## Contingency Planning

**Due:** Tuesday, 19 November 2024, 9:00 PM

Using the NIST SP800-61r2 Computer Incident Handling Guide, NIST SP800-184, Principles of Incident Response & Disaster Recovery, 3rd Edition and, Eric C. Thompson's book Cybersecurity Incident Response, and other resources available in conjunction with the course lectures and materials create an incident response and/or a business resumption plan (BCDRP) for your faux organization. Your plan needs to align with the NIST CSF and address all aspects of the incident response life cycle - preparation, detection & analysis, containment, eradication & recovery, and post-incident activities. Your plan may address a single incident-disaster or multiple incidents and/or disasters. This will depend on your risk assessment of your company - its size, industry, location, etc.

Imagine what information would you need to be successful if you just joined the IR/DR/BC planning team for your organization.

Your plan must be written in a professional business quality format. USE APA for formatting and citation reference.

Submit your company's plan in pdf format in Moodle prior to the due date. You may only submit the document once. Each team member must submit their copy of the final document.

## Submission status

<b>Group</b>	Savoury Sauce Restaurants	
<b>Submission status</b>	Submitted for grading	
<b>Grading status</b>	Released	
<b>Time remaining</b>	Assignment was submitted 1 hour 44 mins early
